| • JPA | • SQL | • AJAX | • Cloud Programming |

WORK EXPERIENCE

The Software Guild – Minneapolis, MN

Jan 2020 – April 2020

Java Apprentice:

- Created an application that can read and write flooring orders using the MVC pattern. Application incorporated spring dependency injection and goes through unit testing. Application would write a txt file of orders created with the function to export the orders.
- Programmed a vending machine that calculates money taken in by the user and returns proper change. Developed using MVC pattern, Java, and unit testing. Vending machine also kept track of inventory.
- Set up a guessing game, much like the popular board game “Master Mind”, by taking in JSON data and converting it into objects that could be transferred in a SQL database. The game was created using MVC pattern, Java, MySQL workbench and Spring Boot.
- Collaborated in a group of 3 to design and develop a full-stack blogging website. The website manages and handles multiple users, with a single admin having the ability to approve and deny posts submitted by users. Primary responsibilities include designing and implementing spring boot Security, as well as a search bar looking for specific hashtags. The application would encrypt user passwords and assured each username was unique. The application was created using MVC pattern, JPA framework, Java, MySQL, HTML, CSS, JS and Thymeleaf.

Redstone American Grill, – Minnetonka, MN

July 2019 – PRESENT

Server:

- Delivered a high-quality dining experience by providing expertise on menu options and promotional.
- Ensured customer satisfaction through promoting excellent service by responding to guests needs during high traffic busy hours.

Optum Health – Eden Prairie, MN

Nov 2018 – July 2019

Sr. Customer Service Rep:

- Assisted health providers and patients with difficulties concerning payment responsibilities for complex medical condition claims. Claims consisted of Cancer, Transplants, Infertility and Travel & Lodging.
- Resolved 20-35 inquiries a day concerning missing payments by conducting research withing ISET, IQUE, FACETS, WAND along with a few other databases. Inquiries from medical providers and patients required a high degree of sensitivity, precision, and efficiency.
